Hi Badgers, hopefully we are now all back into the swing of the Summer Term even if most of the time we are still at home.

I will continue to set you activities on Active Learn and DB Primary, and remember you can access Times Table Rock stars at any time (well done James and Ruby who have chosen to play against me, come on the rest of you give it a go!) here are ideas for other activities to complete which are directly linked to the learning we would have been doing if you were in school this week.

All written activities can be completed in the exercise book we put in your home learning pack.

1. I have allocated ‘Amazing Inventions’ for you to read on Active Learn.
   - Read screens 2 & 3
   - Look around you for all the things that have wheels. Are some of the wheels hidden?
   - What is your favourite way of travelling? Choose one way e.g. plane, car, bike, and either do some research to create a fact file, including pictures and diagrams. Or Write a story of poem including your favourite mode of transport.

2. In maths this week we would have been looking at area and perimeter. There are some activities on Active Learn or you could try some of these:
   - Choose some objects around your house e.g. the table, a book and work out the area and perimeter
   - When you are confident go bigger and measure your bedroom or garden and work out the area and perimeter.
   - Now you could use your measurements to draw a plan of the room or garden and draw objects within it.

Remember – Perimeter – is all the way round the outside

Area (for a square or rectangle) is the width X the length

For a triangle – half the base X the height
3. Science for this half term is Electricity – BBC Bitesize is going to be our friend! Watch these two clips:
   What is power?
   Can you change a circuit?
   Now treat yourself to playing one of the games.

4. P.E. – Have you been working out with Joe Wicks on TV? If not, give it a go and see if Mum or Dad will too.
   As the weather is lovely try setting up an obstacle race in your garden, challenge other members of your family to take part too. We would love to see some photos!

5. Art – This week’s art is all about faces!
   You are going to try to create your own version of this by:
   • Drawing a face – it could be yours, someone you know or somebody famous, how about a cartoon character?
   • Once you are happy with your drawing, copy it several times on a piece of paper – You could use baking paper to trace it if you wanted them all to be the same.
   • Now add colour to your faces, using pens, pencils, crayons, paints whatever you have at home
   • Ask Mum or Dad to photograph it and send me the image either via DB Primary or on the homelearning@latchingdon.essex.sch.uk email.
   
   Good luck with this week’s learning, remember you can always email me through DB Primary, hopefully see you soon Mrs Kemp
