## Covid-19 symptom parental support tool September 2020

If your child is unwell, do they have:

- A new continuous cough?
- A fever (high temperature over 38°C)?
- 3. A complete loss or change of taste or smell?

NO

Current advice Sept 2020:

- Keep your child off school at home
- Inform your child's school
- Speak to 119 or go to www.gov.uk/coronavirus
- If advised, then arrange
   a Covid test to be done
   Your child and household
   should self isolate until you
   have the result of the test.

https://www.nhs.uk/conditions/coronavi rus-covid-19/testing-and-tracing/what-

your-test-result-means/

YES

Does your child have an underlying health condition? For example a serious heart or lung condition eg severe asthma, requiring on going hospital appointments.

NO

Would you have kept your child off school before Covid-19?

YES

Keep your child off school and inform the school

YES

Speak to their specialist team for advice regarding testing or if you are concerned and you have not already seen or spoken to them. Keep them off school whilst you do this.

NO

Children who are otherwise completely well with only:

Runny nose or sneezing
Mild Cold symptoms without fever

Can go to school as normal

You may not be able to tell the difference between Covid-19 and other viral illness

Babies and children can still get illness that can make them unwell very quickly. It's important to get medical help if you need it.

Call 111 if you're worried about a baby or child.

If your child seems very unwell, is getting worse or you think there's something seriously wrong, call 999.

Do not delay getting help if you're worried. Trust your instincts

A runny or stuffy nose is rarely a symptom of Covid-19 (WHO 2020) Sneezing is not a symptom of Covid - 19 (WHO 2020)
